## 1 DEFINITIONS

For the purposes of this document, the following definitions apply:

- *Directive 2014/55/EU*, the Directive of the European Parliament and of the Council of 16 April 2014, number 55, relating to electronic invoicing in public procurement;
- *Technical rules*, this document;
- *IPA (Index of Public Administrations)*, the official archive of public bodies and public service managers, managed by the *Agency for digital Italy* (AgID);
- *IPA code*, the unique alphanumeric code that identifies each organisational unit registered on the Public Administration Index (IPA);
- *SDI (Interchange system)*, the system referred to in law 244/2007, art. 1 paragraphs 211 and 212, managed by the Revenue Agency;
- *XML (Extensible Markup Language)*, the set of rules for structuring the data being processed in text format, compliant with W3C recommendation Extensible Markup Language (XML);
- *XMLPA*, invoice represented according to the format referred to in Annex A to Italian Ministerial Decree 55/2013;
- *Semantic model*, the structured and logically interrelated series of terms and meanings that specify the essential elements of an electronic invoice, as defined by the CEN (European Committee for Standardisation) with the European Standard EN 16931-1:2017 +A1 2019 (E) as well as with the related errata EN 16931-1:2017+A1:2019/AC:2020 which constitutes, with validity 27 August 2020, an integral part thereof;
- *UBL (Universal Business Language)*, ISO/IEC 19845 standard XML syntax in version 2.1, which defines an open library of 61 electronic business documents including the invoice;
- *CII (Cross Industry Invoice)*, UN/CEFACT standard, which defines a data model and syntax for the electronic invoice; the version referred to in this document is 2.0;
- *CEN compliant formats*, the syntax defined by CEN in the technical standard EN 16931-2;
- *CIUS-IT*, the set of rules valid for invoices issued to Italian contracting authorities and contracting entities, defined on the basis of the provisions of the European standard EN 16931-1:2017 +A1 2019 (E) and errata referred to in item 8 above, additional to those of the semantic model and syntax *UBL* and *CII*. Failure to comply with these rules causes the invoice to be rejected.

## **2 SCOPE AND PURPOSE OF THIS DOCUMENT**

This document contains the technical rules of the management process by the Exchange System of electronic invoices pursuant to art. 3, paragraph 1, of Italian Legislative Decree 148/2018.

In particular, a description is provided of the rules of the process of receiving, checking and forwarding invoices in *UBL* (*Universal Business Language*) or *CII* (*Cross Industry Invoice*) from abroad (hereinafter Cross Border) and those of an invoice in customised UBL format for Italy within the national territory (hereinafter Domestic).

These specifications are derived from ***Specifications of the technical rules referred to in Annex B of Italian Ministerial Decree 55 of 3 April 2013*** (hereinafter SDI specifications), a document to which reference should be made unless otherwise regulated in the following paragraphs.

### **3 METHODS OF ISSUING AND TRANSMITTING INVOICES**

This paragraph indicates the rules for issuing and transmitting through SDI an electronic invoice, in cases where one of the formats provided for by the rules on electronic invoicing in public procurement is adopted (therefore expressed in the syntax UBL or CII), according to the rules of the European semantic model, and those introduced with CIUS-IT.

It is specified that the EN16931 defines

- Core Invoice Usage Specifications as that set of rules that constitute a "restriction" of the core Invoice,
- Extension as that set of rules that "extend" the semantic model the core Invoice.

The clarification is combined in this document in the adoption of three groups of rules:

- A. CIUS (or restrictions) that must be respected by incoming cross-border invoices;
- B. CIUS (or restrictions) which must be respected by domestic invoices (and which are added to the restrictions in the previous letter A);
- C. Extension (or extensions) that must be respected by domestic invoices (and which are in addition to the restrictions in the previous letters A and B).

The complex of additional rules and controls thus composed for domestic invoices, guarantees compliance of the invoice with the Italian tax system.

Both CIUS-IT and the Extensions are described in the remainder of the document.

In the event that the issuer has chosen the qualified electronic signature as a tool to guarantee authenticity and integrity, pursuant to art. 233 of the dir. 2010/45/EU, the following types of signature must be used:

1. CAdES-BES format (CMS Advanced Electronic Signatures) with structure adhering to the public specification ETSI TS 101 733 V1.7.4, as required by current legislation on the subject starting from 1 September 2010;
2. XAdES-BES format (XML Advanced Electronic Signatures) with structure adhering to the public specification ETSI TS 101 903 version 1.4.1, as required by current legislation on the subject starting from 1 September 2010; within the XML signature format, the only accepted method is the "enveloped" one

### 3.1 NAME OF THE FILES TO BE TRANSMITTED

The nomenclature of the file to be transmitted to the SDI remains unchanged with respect to that established in SDI specifications, as well as the differentiation regarding the value to be attributed to the 'country code'

|              |   |   |
|--------------|---|---|
| Country code | Unique identifier of the transmitting subject | Progressive unique identifier of the file |
|--------------|---|---|

In particular, the 'country code', always consisting of two characters, must not be a code expressed according to the ISO 3166-1 alpha-2 code standard, but assumes one of the following default values:

- **II** for invoices in *CII* format
- **UB** for invoices in *UBL* format.

The separator between the second and third elements of the file name is the underscore ("\_") character, ASCII code 95.

E.g.:

*UB12345678901\_00001.xml*

*II99999999999\_00002.xml*

it is however possible to transmit a file in compressed format containing one or more files also issued in different formats (*XMLPA*, *UBL*, *CII*). The only compression format accepted is the ZIP format; in this case the file name reflects the nomenclature established in *SDI specifications* also for the 'country code' component

E.g.: *DK88888888\_00001.zip*

which contains, by way of example, an invoice in *CII*, one in *UBL* and one in *XMLPA*

*II99999999999\_00002.xml*

*UB12345678901\_00003.xml*

*DK88888888\_00004.xml*

Each file sent to the SDI must have a name other than any other file sent previously.

### **3.2 CHANNELS FOR THE TRANSMISSION OF INVOICES AND NOTIFICATIONS**

Regarding use of the transmission channels of the files containing the invoices in UBL and CII and of the messages of receipt and notification, the interview with the SDI takes place through one of the methods regulated in the SDI Specifications: certified e-mail (PEC service), application cooperation on the Internet (SDICoop service), SFTP protocol (SDIFTP service) and web through the Invoices and Remuneration portal (<https://ivaservizi.agenziaentrate.gov.it/portale/>).

Reference should be made to the SDI specifications for further details on the characteristics of each individual channel.

## **4 PROCEDURE FOR SENDING THE INVOICE TO THE SDI**

The flow of sending an electronic invoice issued in UBL or CII is characterised by the following stages.

The issuer prepares the invoice in compliance with the semantic and syntactic rules described in the [paragraph 4.1](#).

The file thus generated is transmitted to the SDI through the channels and methods illustrated in the [chapter 3](#).

The SDI proceeds with processing of the file through:

- the verification of compliance of the invoice sent with respect to the semantic model and format syntax (UBL or CII);
- verification of compliance with the Italian CIUS;
- verification of compliance with the Italian extension for Domestic invoices;
- a translation step from the original format (UBL or CII) to the format XMLPA;
- affixing of a CAdES format signature with a certificate issued by the Revenue Agency to the translated file;
- the execution of the checks provided for in the SDI specifications on the 'translated' file;
- Sending of the 'translated' file, the conversion report and the original file to the recipient and related notifications to the sender.

## 4.1 HOW TO PREPARE THE INVOICE FILE

The following paragraphs describe the rules and constraints for preparing an invoice file in *UBL* or *CII*.

### 4.1.1. SEMANTIC RULES

The file prepared in *UBL* or *CII* must respect the European semantic model defined by the EN 16931-1:2017 +A1 2019 (E) (**Errore. L'origine riferimento non è stata trovata.**) of which it is recalled that the relative errata EN 16931-1:2017+A1:2019/AC:2020 constitutes, with validity 27 August 2020, an integral part thereof.

### 4.1.2. SYNTACTIC RULES

The file, prepared in a format compatible with the EN 16931-1:2017 +A1 2019 (E) and its errata, must be consistent with the syntaxes listed in the CEN TS 16931-2 document

- UBL 2.1, for files in UBL
- UN/CEFACT CII 16B for CII format files.

### 4.1.3. ITALIAN RULES

#### 4.1.3.1. DEFINITION OF THE ITALIAN CORE INVOICE USAGE SPECIFICATION

The rules of *CIUS-IT* complete those already provided for by the semantic model and by each of the syntaxes indicated by the standard, ensuring that the invoice file, compiled in compliance with them, contains all the elements to be accepted and transmitted.

Triggering of the CIUS relating to letter B referred to in paragraph 3 above, or the domestic CIUS, is activated when the BT-40 “Seller country code” is valued at IT; while the CIUS relating to the letter A referred to in paragraph 3 above, or the cross-border CIUS, are activated when the BT-55 “Buyer country code” is populated with IT and the BT-40 is different from IT.

The CIUS-IT is identified, within the file in which the invoice is represented, discriminating according to the value present in BT-40 and BT-55 by means of the following entries that value the BT-24:

- BT-40 equals to IT, then:

|       |      |                              |   |
|-------|------|------------------------------|---|
| BT-24 | 1..1 | Specification identification | urn:cen.eu:en16931:2017#compliant#urn:fatturapa.gov.it:CIUS-IT:2.0.0#conformant#urn:fatturapa.gov.it:EXT-IT:1.0.0 |
|-------|------|------------------------------|---|

- BT-40 different from IT e BT-55 equals to IT, then:

|       |      |                              |   |
|-------|------|------------------------------|---|
| BT-24 | 1..1 | Specification identification | <b>urn:cen.eu:en16931:2017#compliant#urn:fatturapa.gov.it:CIUS-IT:2.0.0</b> |
|-------|------|------------------------------|---|

By way of example and not exhaustively, it is shown below how the identifier is expressed in the two syntaxes if the invoice is cross-border (i.e. BT-40 different from IT and BT-55 equal to IT):

for **UBL 2.1**

```
<cbc:CustomizationID>
  urn:cen.eu:en16931:2017#compliant#urn:fatturapa.gov.it:CIUS-IT:2.0.0
</cbc:CustomizationID>
```

for **UN/CEFACT CII 16B**

```
<rsm:ExchangedDocumentContext>
<ram:GuidelineSpecifiedDocumentContextParameter>
<ram:ID>
  urn:cen.eu:en16931:2017#compliant#urn:fatturapa.gov.it:CIUS-IT:2.0.0
</ram:ID>
</ram:GuidelineSpecifiedDocumentContextParameter>
</rsm:ExchangedDocumentContext>
```

CIUS-IT provides for specific use and restrictions on the information elements (BT - Business Term) of the semantic model so that invoices expressed in the languages provided for by the European directive can be transmitted to the recipient Public Administrations through the SDI.

The rules defined within the CIUS-IT are listed in **Errore. L'origine riferimento non è stata trovata..**

#### Directions for delivery

To define the buyer's electronic address, the syntax provided by the European standard on electronic invoicing (EN16931) is used, which makes it possible to declare both the electronic address identifier and the identification scheme on which it is based on the invoice.

The identification scheme "0201" is the code in the list of EAS codes (Electronic Address Scheme) corresponding to the Index of Public Administrations, that contains a list of all the unique electronic addresses that can be used.

In the section dedicated to the buyer, the electronic address tag must be accompanied by a specific attribute (schemeID) containing the value "0201".

Below is an example of how the tag will be constructed assuming that "UFF001" is an IPA code:

- for UBL invoice:

```
<cbc:EndpointID schemeID=" 0201 ">UFF001</cbc:EndpointID>
```

- For CII invoice:

```
<ram:URIID schemeID="0201">UFF001</ram:URIID>
```

#### **4.1.3.2. DEFINITION OD EXTENSIONS**

For domestic invoices, in addition to CIUS-IT, as described above, a series of "Extensions" are also valid (see what is illustrated in paragraph 3, letter C).

As a domestic invoice is recognised because it includes the value of BT-40 with the initials of the country of origin, that is, in this case, the initials IT (Italy), then it will need to be prepared in such a way as to respond both to the semantic restrictions of CIUS-IT and to the rules defined on further elements through the Extensions, in order to guarantee compliance with Italian tax peculiarities.

## 4.2. TRANSLATION PROCESS

The invoice files that have passed the checks referred to in sections 1 and 2 of paragraph 4.3, are passed to the translation service which has the purpose of producing an XML file in the XMLPA.

The “translated” XML file differs from the file in XMLPA “native” from the nomenclature (see paragraph 3.1).

The translated file in XMLPA contains, as attachments (tag <Attachment>):

- the original invoice file, recognisable by the value contained in the field<AttachmentName> :

<AttachmentName> original\_invoice </AttachmentName>

- any file in “.txt” format containing the list of unmapped values, recognisable by the value contained in the field<AttachmentName> :

<AttachmentName>not-mapped-values.txt</AttachmentName>

- any file in ".csv" format containing the list of truncated values because they are longer than the maximum expected in the XMLPA format, recognisable by the value contained in the field<AttachmentName> :

<AttachmentName>trimmed\_fields.csv</AttachmentName>.

### **4.3. CHECKS**

The SDI, for each file correctly received, carries out a series of checks in preparation for forwarding of it to the recipient. Failure to pass these checks generates the rejection of the file which, consequently, is not forwarded to the recipient of the invoice

Some types of control do not depend on the type of file (in "CEN compliant" format or in the XMLPA format), in particular the controls:

- on compliance with the file naming rules;
- of uniqueness of the file;
- of integrity and validity of the signature (for signed files);
- on compliance with the general rules of structure of a file in XML format.

Other types of controls are reserved only for files in CEN-compliant format. In particular:

#### Syntactic check

The verification is performed in order to verify the compliance of the UBL or CII file with the respective XSD schemes; if the check fails, the file is rejected with the following reason:

Code 00701 - File does not conform to the correct syntax (in the description of the message there is a precise indication of the non-conformity, as shown in the parsing of the file)

#### Semantic verification

Verification is performed in order to intercept UBL or CII file cases that are not compliant with semantic data model of the core elements of an electronic invoice; if the check fails, the file is rejected with the following reason:

Code 00702 - File not compliant with the semantic model (in the description of the message the precise indication of the non-compliance is reported, as shown in the parsing of the file).

#### CIUS verification

Verification is performed in order to intercept file UBL or CII cases that do not comply with the restrictions provided for by the CIUS-IT; if the check fails, the file is rejected with the following reason:

Code 00703 - File not compliant with the CIUS-IT and/or the Extensions (the description of the message contains the precise indication of the non-compliance, as shown in the parsing of the file).

The controls applied to the translated file are those provided for in the Technical Specifications referred to in Annexes A and B of Italian Ministerial Decree 55/2013 for files in XMLPA.

#### **4.4. RECEIPT/NOTIFICATION MANAGEMENT**

The process involves the exchange between the parties of receipts/notifications which constitute, for the subjects who receive them, feedback on the processing of the file and on the progress of the invoicing process.

The types of receipts/notifications remain those defined in the SDI Specifications and are forwarded through the same channel used for transmission of the invoice.

Also with regard to the nomenclature of notifications, the same rules defined in the SDI specifications, with which it will be possible, through the 'country code' component, to distinguish the type of file transmitted (XMLPA, UBL, CII).

##### Bilingualism of the Rejection Notice

With regard to the information describing the errors present in the 'rejection notification', Italian-English bilingualism is envisaged for all types of invoices received by the SDI.

The 'rejection notification' maintains the same structure already provided for by the SDI specifications, with the duplication of the <Error> tag to manage bilingualism: the single tag will be repeated twice with the first occurrence valued for the Italian language and the second for its translation into English.

Example:

```

## APPENDIX 2: CIUS-IT RULES

For each rule introduced, the following are indicated:

- **CIUS ID** - Identification of the rule within the Italian CIUS; for extreme clarity, and in full correspondence with the last column of the table below (called EU/IT, see the description immediately following in the last item), the typical restrictions of the Italian tax system (therefore applied to all invoices in which the Seller country code in BT-40 is valued at "IT") are indicated by adding to the prefix BR-IT, also the acronym DC (Domestic CIUS) and a progressive identifier;
- **Type of rule** - Classification of the rule according to the indications of the EN 16931-1:2017 +A1::2019 (E) according to the categories and sub-categories defined: Business terms, Cardinality, Semantic data type, Codes and Identifiers, Business rules, Value domain for an element;
- **BT** - Code and name of the business term(s) of the semantic model affected by the rule;
- **BT Description** - description of the business term(s) of the semantic model affected by the rule;
- **Elements mapped in XMLPA** - Code and name of the element(s) of the FatturaPA scheme affected by the rule;
- **Rule description** - the definition of how the use of business terms of the semantic model should be restricted;
- **EU/IT** – EU: invoices issued by EU suppliers (including Italian ones); IT: invoices issued by Italian (domestic) suppliers. It should be noted that all the rules classified as EU also apply to domestic invoices, but not the other way around. This information facilitates identification of the rules to be applied only to domestic invoices.

The names and descriptions of the elements of the semantic model are reported in English as defined by the standard.

## APPENDIX 3: RULES for EXTENSIONS

For each rule introduced, the following are indicated:

- **EXTENSION ID** - Identifier of the rule within the extension; for extreme clarity, and in full correspondence with the last column of the table below (called EU/IT, see the description immediately following in the last item), the extensions typical of the Italian tax system (therefore applied to all invoices in which the Seller country code in BT-40 is valued at "IT") are indicated by adding to the prefix BR-IT, also the acronym DE (Domestic Extension) and a progressive identifier;
- **Elements mapped in XMLPA** - Code and name of the element/elements of the FatturaPA scheme affected by the rule;
- **Rule description** - the definition of the characteristics of the "extended field" and/or of the rationales underlying its use;
- **EU/IT** – EU: invoices issued by EU suppliers (including Italian ones); IT: invoices issued by Italian (domestic) suppliers. The Extensions apply ONLY to Italian suppliers. This information facilitates identification of the rules to be applied only to domestic invoices.

## APPENDIX 4: MAPPING RULES

This Appendix shows the mapping rules illustrated through two tables:

- FatturaPA and semantic model,
- Domestic invoice, semantic model and FatturaPA

The combination of the two table representations makes it possible to highlight the mapping on the XMLPA layout as well as the effects deriving from the new CIUS and, above all, from the Extensions, which would otherwise remain unexpressed.

The correspondence with the FatturaPA fields is illustrated by indicating the mapping rules with:

- the FatturaPA and CEN layouts,
- the Domestic Invoice layouts, the related extensions and FatturaPA.

This illustrative mode is therefore used to obtain the complete layout of an invoice available, both in the XMLPA structure and in UBL Italy (including the extended elements).

## Appendix 4.1 FATTURAPA AND THE SEMANTIC MODEL

The columns represent:

- **XMLPA ID** - identifier/level present in the layout in tabular form of the XMLPA format,
- **Route** - corresponding information element in XMLPA,
- **Cardinality** - necessity and cardinality of the element (the first number is 0 if optional, 1 if mandatory; the second represents the maximum number of occurrences for the element),
- **Field name** - name of the format XML tag XMLPA,
- **BT ID** - Business Term name,
- **BT Description** - Business Term description,
- **Mapping Rules and Update Notes** - description of the mapping rule and references to the elimination of previous rules
